WordRush Privacy Policy

Effective Date: August 30, 2026

This Privacy Policy describes how Wolverine Interactive LLC ("Wolverine Interactive," "we," "us," or "our") collects, uses, stores, and discloses information in connection with the WordRush mobile application ("WordRush" or the "App"). By downloading, accessing, or using the App, you agree to the terms of this Privacy Policy.

1. Information We Collect

Account information. When you first play, the App creates an anonymous account identified by a randomly generated identifier issued by Firebase Authentication. You choose a username, which is displayed to other players on leaderboards, in multiplayer matches, and to players you connect with as friends. We do not collect your real name, email address, phone number, or contacts, and no such information is required to play.

Gameplay and progress data. Your scores, words found, gameplay statistics, badges, trophies, rank, daily streak, in-game currency balance, and cosmetic items are stored against your anonymous account identifier so that your progress persists.

Leaderboards, matches, and friends. When you play the Daily Board or a ranked match, your username and score are transmitted to our servers and are visible to other players. Friend codes allow players to connect; a friend code identifies your anonymous account, not your identity.

Device and technical information. We and our service providers may collect device identifiers (such as the Identifier for Advertisers, subject to your consent), general device information, IP address, approximate location derived from IP address, interaction data, session duration, performance analytics, error logs, and crash reports.

Purchases. When you make an in-app purchase, Apple processes your payment through its own secure systems. We do not receive or retain your credit card number, billing information, or any directly identifying financial data. We receive purchase receipts and transaction identifiers solely to verify purchases and deliver purchased content.

Certain diagnostic and technical data may also be collected directly by Apple as part of iOS and App Store operations and is governed exclusively by Apple's Privacy Policy.

2. Use of Information

We use the information collected through the App to operate, maintain, and improve WordRush; provide multiplayer matches, leaderboards, and social features; ensure functionality, reliability, and performance; analyze usage patterns and gameplay behavior; provide and measure in-app advertising; measure the effectiveness of our advertising campaigns; verify and deliver in-app purchases; prevent fraud, cheating, or misuse; and comply with applicable legal obligations. We do not use collected information for purposes unrelated to the operation, improvement, or promotion of the App.

3. Advertising, Analytics, and Attribution Technologies

WordRush incorporates third-party software development kits ("SDKs") to support game functionality, provide an optional ad-supported experience, and measure our advertising:

- **Google AdMob** delivers optional rewarded advertisements. If you grant permission through the iOS App Tracking Transparency prompt, AdMob may use your device's advertising identifier to personalize ads; if you decline, advertisements still function but are not personalized. In regions where consent is required (such as the EEA and UK), a consent form is presented before any ad-related processing occurs.
- **Firebase** (Google) provides authentication, data storage, server logic, and performance analytics for the App's online features.
- **TikTok Business SDK** measures the effectiveness of our advertising campaigns (for example, whether an install or purchase followed an advertisement), subject to the same App Tracking Transparency consent.

Each third party processes data in accordance with its own privacy policy.

4. Sharing of Information

We do not sell personal information. We share information with the service providers identified above strictly to deliver advertising, attribution, analytics, purchase verification, and the operational services required for the App to function as intended. Your username and scores are visible to other players as an inherent part of leaderboards, matches, and friends features. We may disclose information if required by law, regulation, legal process, or governmental request, or where necessary to protect the rights, property, or safety of Wolverine Interactive, its users, or the public.

5. Children's Privacy

WordRush is not directed to children under the age of 13, and we do not knowingly collect personal information from children. The App does not collect real-world identity information from any player. If you believe a child under 13 has used the App and provided information, please contact us so that we may promptly delete it.

6. Data Retention

Account and gameplay data are retained for as long as your account exists. Daily leaderboard entries are associated with the day on which they were posted. Diagnostic and analytics data are retained only as long as reasonably necessary to operate, maintain, and improve the App or to comply with legal requirements, after which they are deleted or anonymized.

7. User Rights and Account Deletion

You may permanently delete your account at any time from within the App (Settings → Delete Account). Deletion removes your account and its associated data: progress, statistics, rank, currency, cosmetic items, and your current leaderboard entry. Deletion cannot be undone, and virtual items — including purchased in-game currency — are part of the deleted account. Depending on your jurisdiction, you may have additional rights to request access, correction, deletion, or restriction of processing; to submit such a request, contact us using the information below. Because accounts are anonymous, we may only be able to act on data associated with your account or device identifier.

8. International Transfers

The App is operated from servers that may be located in the United States or other countries. By using the App, you acknowledge that your information may be processed in countries with data protection laws different from those of your home jurisdiction. We take reasonable steps to ensure information is handled securely and in accordance with this Privacy Policy.

9. Security

We implement reasonable administrative, technical, and physical safeguards designed to protect the information we collect, including server-side validation of gameplay submissions. However, no method of electronic transmission or storage is completely secure, and we cannot guarantee absolute security.

10. Changes to This Privacy Policy

We may update or modify this Privacy Policy from time to time. When changes occur, the Effective Date above will be updated. Your continued use of WordRush after any changes constitutes acceptance of the revised policy.

11. Contact Information

If you have any questions, concerns, or privacy-related requests, please contact us at:
